

Feedback for RRMP Literature Review Summative

Tutor completing summative feedback: Karen Outram	Student number: 415084
Details of any extensions etc:	Submission Attempt: First submission Second submission

Criteria and weighting	Level	Comments
Knowledge and understanding of the topic/ issues under consideration (30%) To provide an overview of current knowledge on the chosen topic	Excellent	Excellent knowledge of the topic demonstrated. Theoretical research is targeted and the summative moved from one point of the discussion to another in a focused and concise manner. There was an appropriate balance of theory and real world applicability in the content.
Criticality (30%) To highlight similar and contrasting views on your chosen topic	Very Good	Very good critical points developed in the content, that flowed well through the assignment for the most part. There was an appropriate theoretical and 'lived experience' reflection of ASD in the context of AI through the assignment.
Use of relevant sources (20%) To demonstrate an awareness of relevant, current literature	Excellent	Generally excellent use of research resources to show the strengths and limitations of the discussion. You cited regularly through most parts of the assignment to reflect where your research came from. Take this approach for future assignments.
Structure and Presentation (as detailed in the assessment guidance) (10%) To showcase your research and writing skills.	Very Good	Overall structure and presentation of the content completed to a very good standard, [please do just see Academic integrity below for some points to consider regarding academic conventions]. A generally strong and consistent writing style through the majority of your summative.

Academic integrity (10%) To showcase your research and writing skills.	Satisfactory	For future, your list of references need to be alphabetical order. You need to double line space in your paragraphs also. These points were discussed in 'Live' seminars, and so just engage a little more with content to ensure all academic conventions are adhered to. There are a couple of paragraphs that could have been broken down more. Also consider, when drawing the assignment to a close, you can also apply citation through the conclusion. Overall, this a satisfactory outcome – take these points on board for your future assignments as this will enable a generally more holistic grade overall.
Overall		
Positives: <ul style="list-style-type: none">• Some excellent outcomes• With some very good outcomes• And a very good outcome overall		
Points for development: <ul style="list-style-type: none">• Take a little more care with academic conventions• Place your reference list in alphabetical order• And take just a little more time to finesse the assignment from an Academic Integrity perspective, prior to final summative upload
